

INSTRUCTIONS: READ ALL STEPS BEFORE BEGINNING

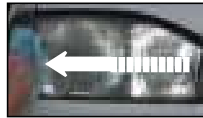

STEP 1 Lightly wet sand entire lens using "Sanding Solution" (not included in Pro kit) horizontally with 1000 grit paper until runoff is clear. Repeat with wet 2000 grit paper. Wipe dry. Repeat entire process on other lens.

STEP 2 Wipe both lenses using "Clarifying Agent Step 1 Wipe". Wipe dry with blue towel.

STEP 3 Evenly distribute a nickel size amount of the "Glossy Sealer" (or half of glass vial, if applicable) onto unfolded "Protective Sealant Step 2 Wipe". Wipe lens **in one direction only** being sure to coat entire surface.

Tips & Techniques:

- Wet sand headlight lenses evenly and until runoff is clear.
- Do not allow product to runoff onto painted surfaces. Place disposable towel on bumper to catch runoff. If product dries on painted surfaces, remove with mineral spirits.
- Coating may appear uneven immediately after STEP 3, but will "settle" when dry (avoid trying to smooth appearance).
- Make sure to apply "Step 2 Wipe" evenly in one direction.
- Avoid retouching lens after STEP 3 as product will quickly become tacky. Quickly wipe runs smooth during application if they should occur.
- Avoid using in direct sunlight. Be sure lens surface is cool before using.

Questions? Feedback? Call us at 1.888.250.5833 or visit our FAQ page at www.autocosmeticproducts.com

NOTE: Lens may appear uneven when wet. Avoid trying to smooth, product will dry uniformly. Avoid performing restoration in direct sunlight. Do not operate vehicle until lens is dry. Dry time is approximately 1 hour in normal weather (75°F;24°C-95°F;35°C) conditions. Do not touch lens with fingertips to test for dryness, use back of hand. Dry time may be longer in cooler temperatures. Severally damaged lenses may require additional repair or replacement. *This kit is not intended to restore damage on the inside of headlamps.*

DISPOSAL: Rinse wipes with soap and water and lay flat to dry before throwing away. CAUTION: COMBUSTIBLE: Keep away from heat and open flame. FIRST AID: Eyes: Avoid contact with eyes. Wear eye protection. In case of eye contact, flush eyes with large amounts of water for 15 minutes and seek medical attention. If Swallowed: Call Poison Control Center, hospital emergency room or physician immediately. Skin: Wear gloves. Avoid excess exposure to skin. Wash hands thoroughly with soap and water after use. VENTILATION: Use in well ventilated area.
